DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- 2. Claims 1 and 8 are rejected under 35 U.S.C. 102(a) as being anticipated by an admitted prior art.

The admitted prior art, depicted in Figs. 3 and 5 and described at pages 3-8 shows a quadrature modulator/method comprising:

- 1) a local oscillator (402) whose frequency f_{osc} is "4/(2N+1) times," i.e., 4/3 times where N=1, of the carrier frequency f_{out} ,
- 2) a frequency conversion block (301 and 250) for multiplying the oscillating frequency by (2N+1)/2," i.e., 3/2 where N=1, see that the output of the frequency multiplier (250) is 3/2 f_{osc}
- 3) a first frequency divider (240) for dividing the output of the frequency conversion block by two to generate a pair of carrier waves, see the two output carrier waves from the frequency divider (240)
- 4) first and second multipliers (210 and 220) for modulating the two carrier waves with a digital baseband signal (101) and
- 5) an adder (230) for adding the two modulated carrier waves to output a digital carrier signal f_{out}.

Application/Control Number: 09/775,927

Art Unit: 2634

Allowable Subject Matter

3. Claims 2-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Baba (US 6,320,912) and Park et al (US 5,717,719) discloses the use of a local oscillator to generate the carrier frequency of a quadrature modulator.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin Y Kim whose telephone number is 703-305-4082. The examiner can normally be reached on 8AM --5PM M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephen Chin can be reached on 703-305-4714. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
